

JOHN BOUDREAUX

FRONT END WEB DEVELOPER

SUMMARY

I am a hardworking creative front-end developer with a drive for learning. I enjoy taking on the challenges of problem solving and hope to someday make the world a better place. My ideal work environment is a highly collaborative team within an agile workflow.

I recently began looking for a more challenging, nurturing and fulfilling career. I desired something I could be proud of and possibly something that can change the world. In my search, I discovered a passion for software development. That passion lead me to Turing, which is my new hope and a catalyst towards a new career.

My hope is to find myself in a position to influence peoples lives through the work that I do and the effort I put forward, solving problems big or small.

PROJECTS

Weatherly • Constructed with JS and React

- Web Application that provides a current weather, 7 hour and 10 day forecast for over 250,000 cities within America using weather underground api database.
- City collection can be modified upon request and current weather persists using json local storage.

Brick City • Constructed with JS through OOP

- 3 levels of play, each increasingly difficult by adding bricks and making the board smaller.
- Harnesses the power of html canvas to create a fun game.
- An excellent introduction into object oriented programming and understanding what components are.

SWAPI Box • Constructed with JS and React-Router

- StarWars API and User Interface.
- Used api calls to fetch the info needed for this project.
- We were given 3 days to build this program, we passed!
- Provides tons of info on all people, places and things in Star Wars and displays them on the DOM.

EXPERIENCE

Turing School of Software and Design • Student • June 2017 - January 2018

- Attended 7 month 1500 hour front end developer course covering:
- Fundamental Web Technologies
- Web Development with JavaScript
- Professional Client-Side Development
- Desktop and Mobile Applications with Web Technologies

RK Mechanical • Purchasing Agent • June 2011 - November 2016

- Negotiated annual partnerships with vendors and ensured payment of hundreds of invoices monthly.
- Procured 8-10 million annually on goods and services.

RMCS • Sales and IT • June 2011 - Current

- Provide onsite and remote IT services for computers and networking. issues.
- Privately owned between myself and my business partner.

Best Buy • Inventory Manager • April 2002 - April 2011

- Worked as a Manager in various stores nationwide, managing inventory and store P&L as well as employees development, one on ones and career engagement.
- Planned and managed the merchandising, replenishment, product inventory, and loss prevention activities on a store level.
