Constructed a small react app for a marine valve startup.
Tech Used: React, JSX, Node, NodeMailer, HTML5 and CSS3

PURCHASING AGENT · RK MECHANICAL · APRIL 2011 - NOV 2016
Identified preferred vendors and negotiated annual partnerships. Ensured payment of hundreds of invoices monthly. Supported a large employee base through procuring 8-10 million annually on goods and services.

GEEK SQUAD · BEST BUY · MARCH 2001 - APRIL 2011
Worked as a tech support and manager in various stores nationwide. Assisted clients with hardware and software issues, providing face-to-face diagnostic help and recommendations. Ran day-to-day operations while ensuring top-quality service and support.

EDUCATION

FRONT END DEVELOPMENT · TURING SCHOOL OF SOFTWARE AND DESIGN

Attended 7-month, 1500-hour, front end developer course covering: Fundamental web technologies, web development with JavaScript, React, Redux, HTML5 and CSS3, professional client-side development, and building desktop and mobile applications with web technologies.

PROJECTS & TECHNOLOGIES

At Turing I enrolled in coursework that involved building JS and React applications, including a weather application using jQuery and API calls to weatherUnderground, an Object-Oriented JS game-engine, a mobile and desktop friendly React-Redux movie database application, and a capstone project with a Node.js and express back-end, utilizing NPM scripts, Webpack, React-Redux, and unit testing with Mocha, Chia, Jest and Enzyme.
